ROCK 92

July 9, 1987

Mr. Carl W. Dabelstein KØSBV
8209 West 78th Street
Overland Park, Kansas 66024

Dear Carl:

Thanks you for taking the time to write and report your reception of WKRR-FM, Rock 92. WKRR-FM is a 100,000 watt FM stereo facility. The city of license is Asheboro, North Carolina, but our studios are located in Greensboro. Our 1,347 foot tower is located in Randleman, between Asheboro and Greensboro. We serve the Greensboro/Winston-Salem/High Point area, known as the Triad. I apologize for your letter being returned, as it went to our old studio address. The second letter made it to the AM facility that was formerly owned in combination with the FM. I have been with WKRR-FM for four months, and this station has only been on the air since January, 1986. Yours is the first letter of its type we have received.

I am happy to confirm your report. I have enclosed the copy of the program log, a sales promo sheet of our station, and a desription of our airstaff. I am also sending some of our window stickers, and a Rock 92 T-shirt (hope it's the right size). Note that Erin played the spots at the :54 break instead of the :35 break.

Again, thanks for writing. I hope to work you on the amateur bands sometimes. If you ever travel into this area, call on my two-meter repeater (located at the transmitter) and we'll meet up. I operate on 80/75, 40, and 15 mostly, both CW and phone.

73,

Tim Berry
